World leading universities

Accessibility of Higher Education in the World Leading Universities (WLU)

Country Rankings

WLU TOP 100; TOP 200; TOP 500; TOP 1000

Methodology

World Leading Universities in the WLU matrix are included in the ranking TOPs ranging from 50 to 1000. There are altogether 15 ranking TOPs.

With relation to this universities are assigned ranks from 15 to 1 according to their provisions in TOPs from 50 to 1000.

The number of students at each university is multiplied by the university rank and divided by the population of the respective country.

This determines the contribution of the university to the overall potential of higher education in this country.

The country's rating in each of the ranking TOPs is determined by the sum of contributions of all country's universities that are included in the respective ranking TOP. The results are normalized to 100.
