

## The First International Program Global World Communicator Education and Science

---

### The International Council of Scientists (ICS)

#### GWC program

**Global World Communicator (GWC). Education and Science** is the first international program in the format of the "World Discussion", introduced with the aim of developing a general concept for assessing higher educational institutions and research centers. This work is carried out in stages and includes surveys, Internet communications and conferences with the participation of highly qualified specialists from different countries within the framework of the International Council of Scientists (ICS).

We invite universities from different countries to join the GWC program and professors from these universities to join the International Council of Scientists (ICS).

Accreditation in the GWC Program will allow the university to join the assessment system and directly participate in and influence the process of assigning international professional ratings. The participation of the university in the program and professors in the International Council of Scientists opens up wide opportunities for international cooperation, for the consolidation of humanitarian values in the modern open world, for an objective assessment of the scientific and educational potential of universities and ways for further development.

The activities of the International Council of Scientists are carried out remotely.
