1000 WLU Matrix. 2019

Methodologies of the different world rankings use own indicators for university assessment. Using the results of various world university rankings allows to create a more general aggregated representation system of the world's leading universities. The assessment results over the past two years are presented in the form of a matrix - country / number of universities in TOPs of various sizes. The matrix elements represent the number of universities in the country included in the TOPs from 50 to 1000.
